DESIGN and MATERIAL UPGRADES in 2010 make the KARNI-PIER BIGGER & BETTER and will provide many, many years of MAINTENANCE FREE summertime fun!

**Welcome to the New & Improved  
Karni-Pier!!!**

**Ask us about  
Interest Free Financing**

Over 57 years ago, the **KARNI-PIER** got it's start in Oshkosh, WI. Sylvester Karst, a local family man and inventor, teamed up with Rudy Nigl, a local businessman, to design and produce the first **KARNI-PIER**.

All production, sales and service have remained as a

local business this entire time, establishing a good reputation for

**QUALITY and SERVICE**  
in the Fox Valley and Northeast Wisconsin.

**A TIME TESTED DESIGN...**The **KARNI-PIER** has been exposed to strong winds, high waves and steady pounding during storms and still holds strong and true!

2009 brought us some exciting new materials that have transformed the **KARNI PIER** into an even better product. The basic tried and tested design has not changed, **BUT** the **updated Eco-friendly materials**, and **wider decking** (was 40 inches x 7' & now is 4' x 10' sections), will provide our customers with a lifetime of maintenance free summer fun.
